

VECTRAN™ for PUNCTURE BARRIER

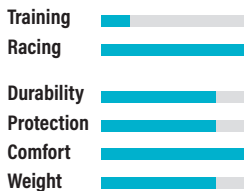

PROTECTIVE RUBBER PLY

SPC SILICA TREAD COMPOUND

Colours

ELITE S3

Guaranteed specified weight. In spite of low weight, this tyre has very good puncture resistance and mileage. Elite S3 <225 g is an enhanced successor of the Tufo's best-seller S3 Lite <215 g. In addition to improved tread pattern, it has a new carcass with higher 210/375 TPI count and wider base tape. The result is a supple ride and excellent handling. VECTRAN™ for PUNCTURE BARRIER under the tyre tread not only provides the best possible puncture protection but also ensures cornering and stability.

Tubulars	Size	Weight	Pressure	TPI Count <small>Sidewall area / Under the tread</small>
ELITE S3 <225 g	28" 23 mm	<225 g	8-15 bar (115-220 p.s.i.)	210 / 375
ELITE S3 25 <265 g	28" 25 mm	<265 g	6-10 bar (90-145 p.s.i.)	210 / 375

*For tyres with weight specified on the tyre label, this weight is guaranteed as the highest.
