A UNIVERSAL TREAD PATTERN FOR THOSE WHO DON'T WANT TO THINK ABOUT WHERE TO GO. HOOKLESS COMPATIBLE.

The tubeless ready Thundero can do it all. The middle part of the tread, composed of tightly packed cubes, creates speed and surprisingly quiet rolling with three indented rows of knobs on the outer tread, which bite literally into any surface. This provides excellent grip even on unpaved surfaces and allows you to turn sharply. The wide tread and the durable flexible Jubena layer covering the sidewalls protect the tyre from receiving damage from stones. A Puncture proof ply under the tread minimizes the risk of punctures and contributes to the overall reliability of the tyre. The high TPI casing construction, together with the soft tread compound, smoothes out any surface and prevents the tyre from bouncing on uneven surfaces. The Thundero is also made to be long lasting and guarantees high mileage.

This HD version extends the existing gravel range with focus on higher loads and operating pressures. Modified construction with stronger warp threads achieves higher durability with only a 30 grams weight increase.
