

# The Legend is Back

Racing Lab

# Engineered Excellence for Python and XC MTB Performance

# What is **RACING LAB** ?

- **Racing Lab range** = Developed with professional athletes for racing and performance
- Pro athletes are looking for the **absolute best** product : every watt count
- **Paris Olympics & World Cups** objective : very demanding criterias
- **Decathlon Ford Racing Team** : Python 3 & Python Race on World Cups & Olympics 2024
- Confidence in our innovations
- The world of XC has changed : **more volume** !

UNLOCKING PERFORMANCE

# The Innovation Journey of Python's Cutting-Edge Design and Technologies

# PYTHON 3

R&D

## Python 3

" The goal with this tyre was to strike a balance between grip, comfort, traction, and **performance**, relative to a tread height that isn't overly aggressive.

**Volume** is key. "

R&D

**The Python 3 tyre is reinforced with the Hardskin textile grid from bead to bead.**

3D - Unveiling Python 3

# Design and Pattern Insight

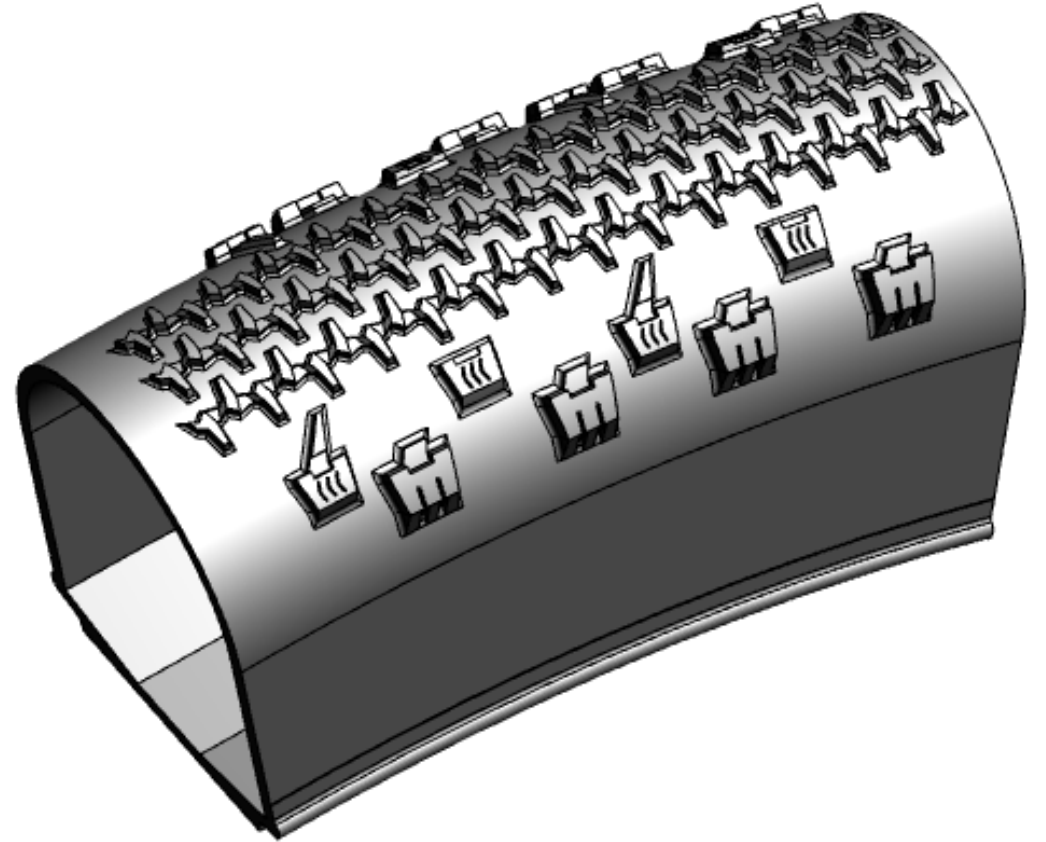

A close-up photograph of a bicycle tire tread, showing a series of small, raised, rectangular blocks. The text "PYTHON RACE" is overlaid in large, white, bold, sans-serif capital letters across the center of the image. The background is blurred, showing the spokes of the wheel and a person's hand near the tire.

# PYTHON RACE

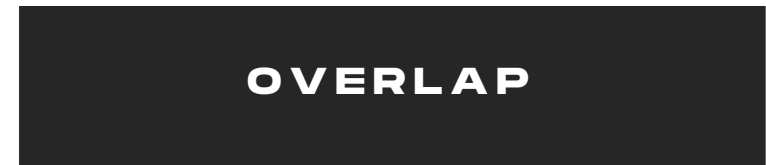

## Design and Pattern Insight

- Crucial focus on performance, oriented towards a specific product emphasizing efficiency and weight.
- Two prototype constructions have undergone lots of testing in races.
- Illustrating the power of the Racing Lab product development process.
- Target weight 600g, with a range between 600g and 640g.

Next-Gen Python: Advancing Performance

# Highlighting Our Latest Innovations: Meeting Market Trends and Olympic Demands

R&D

## Python 3

- Based on legendary **Python**, Hutchinson's *Signature* tyre + Adaptation to modern MTB advancements
- Unmatched versatility for new XC rims → low pressure & wide rims
- Optimization for maximum performance, based on pro athletes' feedback
- New tread design for increased versatility
- Hutchinson combos : options for every condition

Python 3 & Python Race

# Unleashing Next-Gen Python Immense Potential as Leading XC Solutions Worldwide

- Embracing World Cup-Proven Construction
- Addressing 2024 Olympic Games Challenges
- Cutting-Edge Offerings for New XC Needs
- Aligning Products with Current Market Demands while Boosting Team Performance

**Complementary Python 3 and Python Race Tyres :**

- **PYTHON 3** = versatility, catering to most riders' needs
- **PYTHON RACE** = radical performance-focused option

HUTSON  
WE MAKE

HUTSON®

A female cyclist is the central focus, celebrating a victory. She is wearing a dark blue cycling jersey with white stars on the shoulders and a red, white, and blue vertical stripe design on the front, featuring the Ford logo. She is also wearing a black helmet with 'ROCKRIDER' written on it, red-tinted sunglasses, and black gloves. Her arms are raised in a 'V' shape, and she has a joyful expression. She is riding a bicycle with a purple race bib that has the number '3' and the UCI logo. The background is a blurred crowd of spectators, some of whom are clapping and taking photos. There are banners and flags in the background, including one with the word 'EFICIENCIA' and another with a blue and white flag. The scene is outdoors and brightly lit, suggesting a sunny day.
