CITY

STRENGTHS

- An aggressive look for city and touring use
- Varying roughness on the sides to provide good grip

IN PRACTICE

The Republic is available in addition to the Haussmann. It is designed for two types of use: city biking & trekking. The Republic is the new adventurer of the range. It allows cyclists to get out of the city, and discover a new use for their bicycles. Its studded profile allows for better deformation in difficult areas, and therefore greater comfort. It has three different levels of roughness: one on the central tread, and two more on the sides. In addition to the aesthetics, this roughness provides grip in both the city and the country.

CITY TREKKING

CONCEPTS

CITY

TUBETYPE

DESCRIPTION

- Urban tire designed for occasional/leisure use.

BENEFITS

- This technology favours accessibility, resistance and yield.

PROTECT'AIR

DESCRIPTION

Urban tire with a 1 mm-thick anti-puncture reinforcement under the tread.

BENEFITS

Technology offering a very high level of resistance to punctures without compromising on comfort or general yield.

DESCRIPTION

Reflective sidewall bands

BENEFITS

Safety: This technology ensures that cyclists are visible from other road users at night in urban areas.
